

WebPlus X5

Overview

No HTML knowledge required
Design websites the easy way!
There's no need to learn any complicated coding language; WebPlus X5 automatically writes the HTML code for you. All you have to do is decide what you want on your site then drag and drop it into the design area.

All you need – including hosting
WebPlus X5 is packed with a massive range of features – everything you need to create your perfect website. There's free hosting, built-in photo editing, online forms, forums, blogs, RSS feeds, music & video streaming plus much more.

Secure e-commerce
We've teamed up with top providers including PayPal™ so you know your online store will be safe and easy to use for both you and your customers. Setting it up is easy too – a step-by-step wizard helps you to create your store painlessly.

Great for any business
Get found online with built-in search engine optimisation; plus there are handy forms, maps, analytics and more! And there are no limits with WebPlus X5 so, unlike some other programs, you can have as many sites, pages and shop items as you want!

WebPlus X5

New Features

This release of WebPlus makes designing websites easier and faster – even if you’ve never done it before!

Button studio

The built-in Button Studio makes it easy to create attractive, professional web buttons and even full navigation bars – no need for any design experience.

With this dedicated studio featuring smart design tools and handy style presets, you can quickly craft custom buttons to look exactly how you want. You can even create rollover states so these smart web graphics react to mouse hovers and clicks.

Smart panels

These smart panels are great for showing extra information, like contact details or captions, on your website.

Panels can contain anything, appear on command, and can float fixed in place as your page is scrolled. They can be displayed permanently or set to pop-up or vanish when a visitor hovers their mouse over, or clicks on, any button or image of your choosing.

Navigation bar designer

Fresh new navigation bars and a smart new designer for custom styling make it easy to give your sites a contemporary look with polished navigation.

Pop-up lightboxes

Showcase full-size images, forms, etc. In pop-up lightboxes that look fantastic and give your content the focus it deserves.

Actions and interactivity

Apply “actions” to objects to interact with visitors, popping up text or revealing an item. Ideal for showing extra information without cluttering your website.

PayPal® mini cart

Make it easy for shoppers to see what’s in their cart. The PayPal Mini Cart pops up when shopping to inspire confidence and make buying easy.

Other New Features

Upgrade wizard

Seamlessly import all your own content and settings when upgrading from WebPlus X4 to WebPlus X5.

Better compatibility

Import the latest file formats. WebPlus X5 supports efficient SVG web graphics and Word 2010 files.

Templates and graphics

New, professionally-made web graphics and templates offer stylish, contemporary designs to choose from.

Quicker and easier to use

WebPlus X5 is faster, more intuitive, and efficient so you can design and update your websites quicker than ever.

And there’s more...

- Take visitors straight to Street View with our improved and more powerful Google Maps™.
- Photos and graphics will look super-crisp and clean thanks to a new “best quality” export setting.
- Change all the colours on your website with one click using redesigned and versatile colour schemes.
